

Scan to learn more:

- Tighter control from better performance  
best total performance less than 0.15% of span
- Broadest operating range in the market  
static pressure 4500 psi, differential pressure 400"WC
- Reduce implementation by 50%  
temperature transmitter with digital output
- Modularity flexibility, faster maintenance, and lower inventory costs
- Unique and best Experion integration  
transmitter messaging, maintenance mode indication, tamper alerts
