

## Reduce configuration time and downtime for your process temperature transmitters with INOR Connect!

- **INOR Connect** is a completely new way of configuring and monitoring your transmitter without power supply and wiring. Connect your smartphone/tablet to your transmitter via NFC® or Bluetooth® and configure it through the new app: INOR Connect.

- INOR offers **complete range of Transmitters** for **in-head** and **DIN-rail** mounting.

## INOR Connect Advantages:

-**Configure and monitor** your transmitter without power supply and wiring.

-**Easily export and import** configurations to / from your smartphone / tablet via NFC® and Bluetooth® capabilities.

-**Save configurations** on a local server for later use (also possible to send configurations via e-mail directly from the INOR Connect app).

-**Generate a configuration protocol** in PDF format to facilitate the handling of documentation.

-**Password protection** combined with the history of when the **transmitter was last configured and who made it**, you can feel safe when using INOR wireless transmitters.

-**INOR Connect** is available for **Android** and **iOS** devices with configuration and monitoring via Bluetooth®
