

- **M12 connectors** are designed for many automation applications. This product is largely used in the **Dairy, Grain-based, and Industrial Fermentation** industries.

M12 Connector Advantages:

- 1) Compact
- 2) Easily connected and disconnected
- 3) Could include a temperature transmitter
- 4) Improved design
- 5) Water tight connection

Do you need a quick connection for your RTD? Thermo-Kinetics has you covered!

- If your process can't wait and you need to replace your defective temperature probe quickly, a sensor with an **M12 connector** can be the solution.

- You can have these connectors installed on RTD's with different pin configuration: **2-3 and 4 contacts** are available.
